This report has been generated with data provided by local fire departments. Information within this report should not be substituted for final investigative reports.

Questions about the enclosed data should be directed to the North Dakota Insurance Department, Office of the State Fire Marshal.

Greetings

From the Insurance Commissioner

Friends,

2024 was a year of both historic challenges and measurable progress for fire safety in North Dakota. While our state experienced some of the largest wildfires in its history this past October, I'm proud to report that total fires across North Dakota actually decreased compared to 2023. This is a testament to the strength, preparedness, and resilience of our fire service professionals and our communities.

This report reflects the tireless work of North Dakota's firefighters, emergency personnel, and partners at every level of government. Together, we are not only responding to fires but actively reducing them—and that's a win for every community across our state.

Thank you for your continued service, partnership, and commitment to protecting North Dakota.

A handwritten signature in black ink, reading "Jon Godfread".

Jon Godfread

From the State Fire Marshal

Greetings!

Welcome to the Office of the State Fire Marshal's Annual Fire Report for 2024. The results of the data included in this report would not be possible without the efforts of fire departments/districts reporting to our office, our community risk reduction leader, Marcy Ost, gathering the data, and our public information officer, Jacob Just, putting this together. This year, we are celebrating the culmination of these efforts, resulting in 90% of fire departments in North Dakota reporting. This is a new milestone for fire departments in the State and something the fire service should be proud of.

We cannot report 2024 without remembering the devastating and deadly wildfires we experienced in October. I want to ensure that we recognize the firefighters, emergency responders, and community members who came together to fight these fires and minimize the loss. These fires demonstrated what can be achieved by working together in North Dakota, as well as the types of changing fire events to expect in the future.

I want to leave you with a quote by Alan Brunacini: "Firefighting is a dynamic and ever-evolving field. We must be adaptable and willing to embrace change to effectively respond to new challenges and protect lives." I hope the data contained in this report helps you to join us in working towards a better tomorrow by learning from our past experiences.

A handwritten signature in black ink, reading "Doug Nelson".

Doug Nelson

Reported Incidents

North Dakota fire departments reported 51,523 total incidents in calendar year 2024, a decrease of 2,577 or 4.8% from 2023.

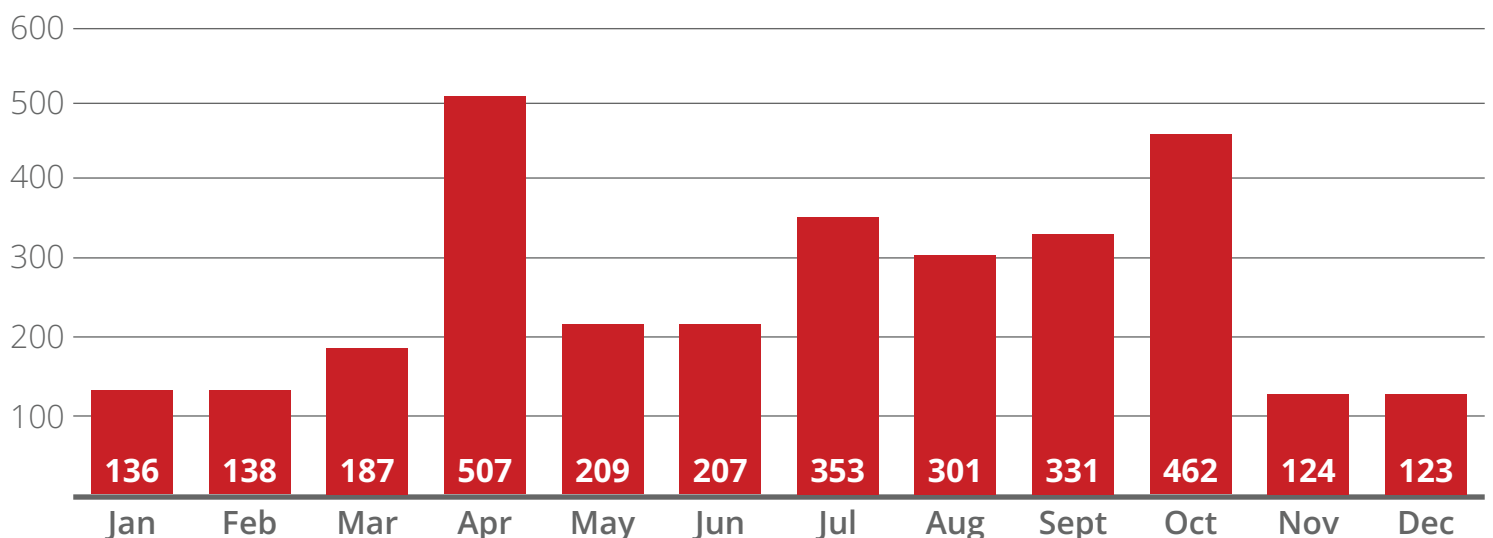

Incident Type (Code)	Total #	Total %
Fires (100s)	3,078	5.98%
Explosion (200s)	183	0.36%
Rescue/EMS (300s)	32,707	63.48%
Hazmat (400s)	1,776	3.45%
Service Calls (500s)	3,047	5.91%
Good Intent (600s)	4,883	9.48%
False Calls/Alarms (700s)	5,606	10.88%
Severe Weather (800s)	30	0.06%
Special Incident (900s)	213	0.41%
Unknown	0	0%
TOTAL	51,523	100%

Fire Incidents

Fires by Month

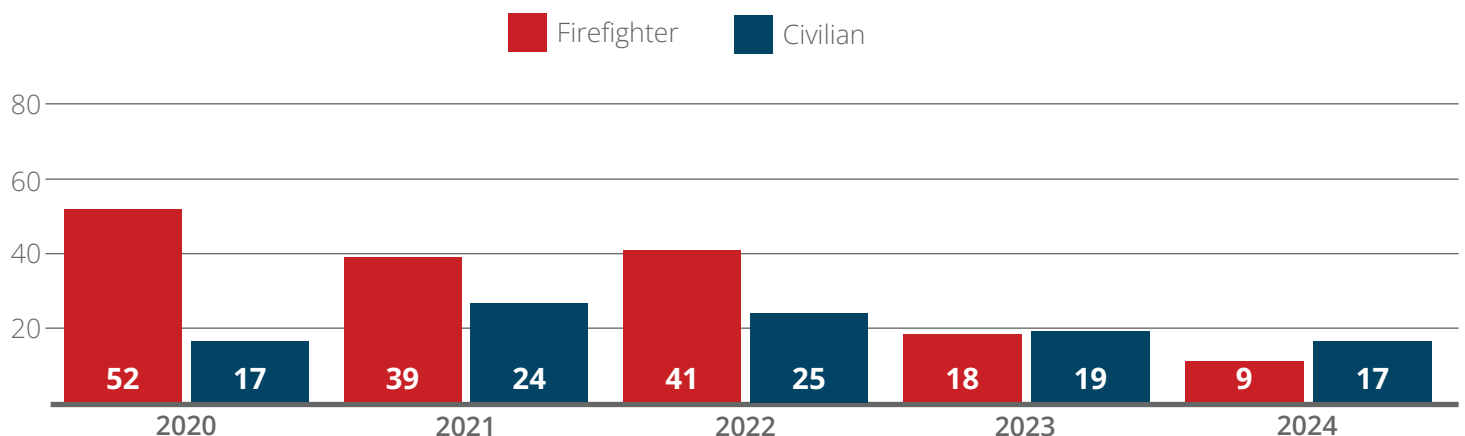

Top Five Fire Characteristics

 Type of Fire	Natural Vegetation 983	Building Fires 846	Vehicle 572	Outside Rubbish 293	Cultivated Vegetation/crop 134
 Fire Origin	Open area, outside (farmland, lawns, etc.) 505	Outside areas, other 381	Engine area, running gear, wheel area 269	Cooking area, kitchen 184	Highway, parking lot, street 64
 Heat Sources	Spark, ember, or flame from operating equipment 243	Radiated, conducted heat from operating equipment 223	Arcing 293	Hot ember or ash 134	Powered Equipment, other 131

There are a number of fires caused by undetermined heat sources, which is a default answer when local fire departments are unable to confidently identify a source. Instances include fires that spread beyond the room of origin, complex fires and a knowledge gap of reporting systems. The Office of the State Fire Marshal is working to address this by providing educational opportunities, communicating investigation findings and reporting reminders.

Fire Department Requirements

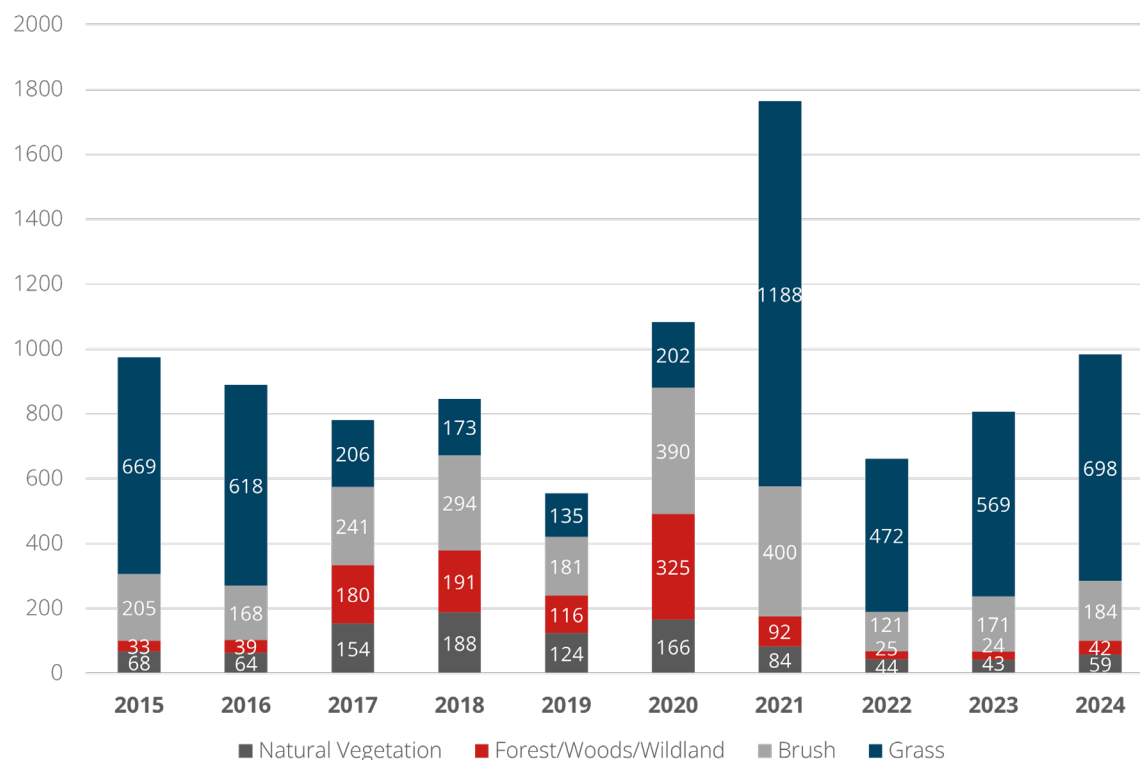

In 2024, North Dakota had 357 registered fire departments. Three-hundred and twenty fire departments actively report incidents to the State and Federal systems (National Fire Incident Reporting System). While the Office of the State Fire Marshal has made great strides in increasing fire reporting (up from 195 in 2019), we still have work to do. To help close this gap, the State Fire Marshal notifies fire departments that need to report each year, offers assistance, and provides information on software fire reporting tools made available by the state forestry department. If warranted, Fire Insurance Tax Distribution funds are withheld if a fire department does not comply or show reasonable efforts to comply with reporting requirements. With these initiatives, we expect to continue increasing fire reporting to ensure our data is as accurate and reliable as possible.

For the reporting year 2024, North Dakota had 14 fire departments that did not maintain the minimum level of service required under the North Dakota Century Code. Though it is drastically lower than the 2019 level of 73 departments, ensuring all fire departments certified through the State Fire Marshal maintain the minimum level of service to residents and taxpayers is a priority. Fire departments that do not meet necessary thresholds set by law are notified, and opportunities are offered at no cost to educate local leaders on steps needed to meet state requirements and identify resources within the state to assist them. Failure to comply or engage in efforts to comply may result in the withholding of state funds. The objective is to secure the compliance of 100% of the departments in the state.

Wildland Urban Interface (WUI) Fires

A wildland fire is any fire involving vegetative fuels, other than a prescribed fire, that occurs in the wildland (an area where development is essentially nonexistent). A wildland fire may expose and possibly consume structures.

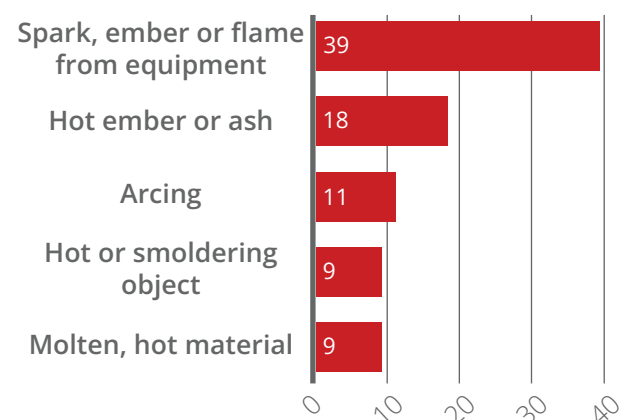

WUI Fires by Year

WUI Fires in 2024

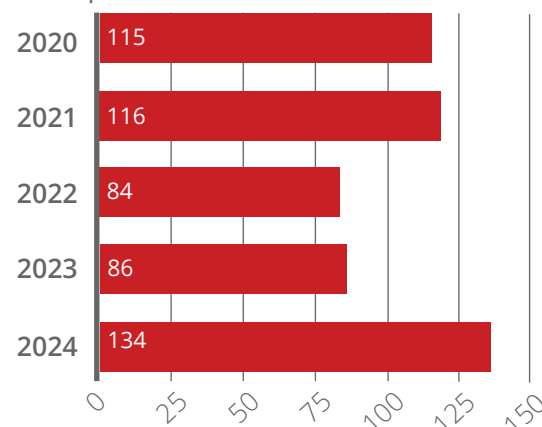

Natural Vegetation fire, other (140)	Forest, Woods or Wildland Fire (141)	Brush or brush/grass mixture fire (142)	Grass Fire (143)
59	42	184	698

WUI Top Reported Heat Sources

Cultivated Vegetation Fires

Cultivated vegetation fire is a grain or crop fire the occurs prior to harvest.

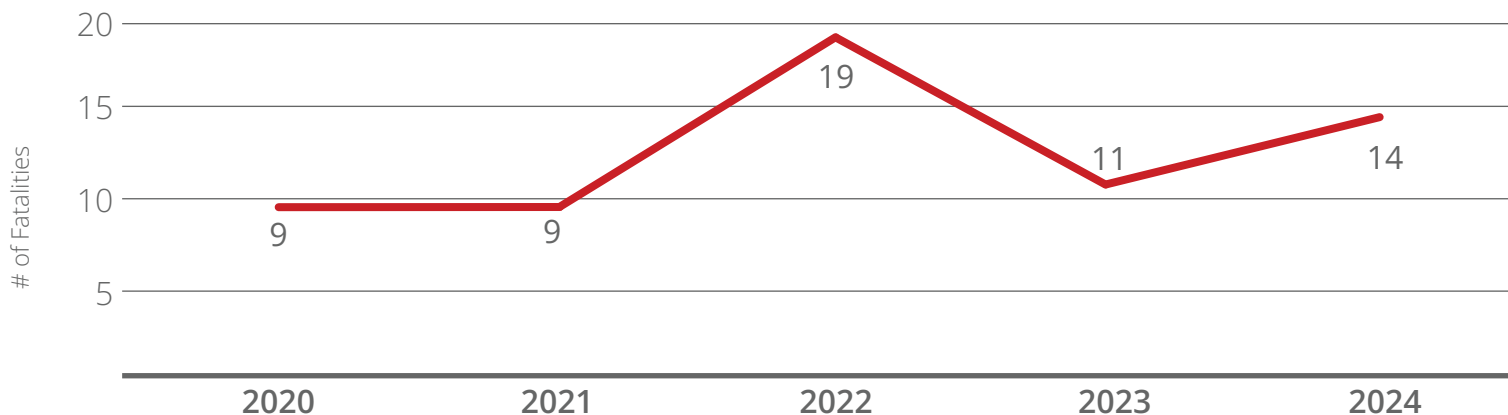

Fire Fatalities

In 2024, North Dakota fire departments reported a total of 14 fatalities due to fire.

Date	Time	City	Type of Property	Fire Origin	Detectors?	Detector Effectiveness
